To those considering AJF for a custom home or remodel:

Over the past eight months we have been undergoing an extensive remodel. In that time we have dealt with three different contractors. The only company that we would refer to anyone is AJF Custom Homes.

Alan Fernandez has extensive knowledge of the local building codes. This has made our inspections go very smoothly and has given us peace of mind about quality workmanship. Quality is a priority for this company.

Supervision and communication between Alan, his managers, and subs has been impressive. Anytime a new subcontractor arrived, Alan or a manager have been present to make sure that communication is thorough. They even stop by during the day to check on the progress of the job. We love this about AJF! Also, they are also always just a phone call away when we have any questions.

Time is money an AJF realizes this. They show up in a timely fashion and estimates of time and money required for a job have been reasonable and accurate. Furthermore, we have always been informed if a sub would not be arriving as scheduled.

Building and/or remodeling can be a stressful experience, but Alan has always left us feeling confident that our interests are a top priority. We highly recommend doing your project with them!

Sincerely,

Howard & Connie Barnes
